Marco Antônio de Amorim Peixoto

Ph.D. candidate in Genetics and Breeding

Phone: +1 (352) 871-7239

Email: marco.peixotom@gmail.com URL: https://marcopxt.github.io/

Last update: 07-01-2023

Summary

I am a creative and self-motivated scientist with a solid foundation in theoretical and practical aspects of biometry, quantitative genetics, genomic selection, breeding simulation, linear mixed models, and Bayesian inference. I generate data-driven evidence for genetics and breeding enhancement purposes based on statistics and genetic data.

Education

Ph.D. in Genetics and breeding. Federal University of Viçosa – Brazil 2023

Dissertation: Appling quantitative genetics tools to breeding program optimization

Advisor: Dr. Leonardo L. Bhering

2016 M.Sc. in Animal Biology. Federal University of Vicosa – Brazil

Thesis: Biogeography and conservation of the anurofauna in the Mantiqueira mountain range. Advisor:

Dr. Pedro S. Romano

B.S. in Biology Science. Federal University of Viçosa – Brazil

Project title: The karyotypes of five species of the Scinax perpusillus group.

Advisor: Dr. Jorge Abdala Dergam

Experience

April 2023 to present

2014

University of Florida, USA

PostDoctoral associated at Sweet Corn and Genomics Lab, University of Florida - USA. Supervisor: Dr. Márcio Resende.

- Development, via package development, of mate allocation algorithms for breeding porpuses.
- Pipeline imputation for SNP calling for Genomic Selection deployment into the Sweet Corn breeding program.

Aug 2021 to

March 2023

University of Florida, USA

Visiting Research Scholar, Sweet Corn Genomics and Breeding. Lab Supervisor Dr. Márcio Resende.

- Planning and optimization of the breeding program via stochastic simulations
- Genetic data analyses (modelling, genomic prediction, genomic hybrid prediction, and selection)
- Hybrid prediction under G×E interaction for recommendation purposes.
- Development of cross prediction (mean, variance, and usefulness) algorithms and mate allocation optimization.
- Multidisciplinary activities through cross-functional teams.

Functional biology: Identification GWAS hits for posterior functional identification.

Evolutionary biology: Modelling, prediction/estimation of BLUEs/BLUPs and heritabilities for evolutionary studies.

- Nursery activities at sweet corn breeding program (phenotyping, selfing, crossing, and selection)

Jan 2021 Mar 2022

GenMelhor, Federal University of Viçosa, Brazil

Scientific coordinator, at Genetics and Breeding study group

- Coordination of scientific sector of the study group, with emphases in the promotion of events for the students from the genetics and breeding program and related areas
- Working collaboratively with the team for symposiums, workshops, and short courses organization for
- Implementation of a podcast (Geneticast) in genetics and breeding

Mar 2019 to present

Federal University of Viçosa, Brazil

Graduate research assistant, at Biometry Laboratory (under Dr. Leonardo L. Bhering advising) as part of the PhD, in Federal University of Viçosa, Viçosa, MG, Brazil.

- Development of statistical genetics approaches with emphases on modelling, prediction, and selection.

- Teaching short courses to companies, students and professionals regarding mixed models, statistics, and plant breeding.
- Working collaboratively at the discussion and implementation of genetic assessment and breeding.

Jun 2016 to Jan 2017 Institute of technology of Minas Gerais State, Brazil

Teaching assistant

- Teaching classes for undergrads students from Agronomy and correlated areas.

 $\begin{array}{ccc} \mathrm{Mar} & 2014 & \mathrm{to} \\ \mathrm{Feb} & 2016 \end{array}$

Federal University of Viçosa, Brazil

Graduate research assistant at biological data analysis Laboratory. Supervisor Dr. Pedro S. Romano

- Definition of singular areas in species distribution from Mantiqueira mountain range region as surrogates to define target areas for conservation and protection.

Aug 2012 to Feb 2014

2023

2022

2022

2021

2021

2021

2021

2021

2021

2021

Federal University of Viçosa, Brazil

Fellowship intern, at Molecular biology laboratory. Supervisor Dr. Jorge Abdala Dergam

- Development of molecular methods for genome sequencing and cytogenetics studies.
- Description of karyotypes of species and populations through classic and molecular techniques.

Skills

Genetics: genomic prediction, quantitative genetics, simulation.

Statistical: Analyses of genetic and agricultural data, linear mixed models, Bayesian inference.

Programming and software: R (advanced), R Shiny App development (intermediate), shell/bash, ASReml-R, BLUPF90 family, Git version control system (GitHub), RMarkdown/Quarto, and C++/Python (basic knowledge).

Soft Skills: Effective communication, Empathy, Fast adaptation, Team Player, Leadership.
